Este libro contiene las comunicaciones que han sido presentadas en la Octava edición de las Jornadas de Concurrencia celebradas en Cuenca en junio de 2000. Este es un foro para el intercambio de experiencias entre los investigadores nacionales tanto de la Universidad como de la Industria en el campo de los sistemas concurrentes y por tanto en él se muestran tanto los resultados teóricos como las aplicaciones industriales más recientes en esta materia. **Proceedings of the IEEE ... Wagner, 1996. Annotation: The proceedings of the IEEE International Workshop on Database and Expert Systems Applications held in September 1996 comprise a total of 25 sessions focusing on object-oriented databases, active and temporal aspects, expert and knowledge-based systems, applications, transaction concepts, and physical aspects, advanced database and information system methods, CSCW, and workflow management systems, and relational and extended relational approaches. Written by a specialist in client-server development and transaction processing systems, this text is a crystal-clear introduction to client-server systems that cuts through the vagueness of most client-server manuals to provide clear-cut technical advice. **Database Directions** James A. Larson, 1995. While solving numerous database management problems, relational database systems are generally limited to centralized systems supporting only structured data. Now *Database Directions* introduces database management technologies and techniques that take readers beyond the limitations of today's relational database management systems. **Database** Patrick O'Neil, 1994. This second edition relies on the same successful approach that distinguished the first: it covers the principles of database theory with unmatched thoroughness and it rigorously links theory to the real world of database programming and administration. A careful discussion of SQL standards and a multitude of examples drawn from actual databases (Oracle, DB2, and Informix) complements the author's concept-oriented instruction, allowing you to develop product-specific understanding and to learn the important differences between the SQL dialects that will enable you to write portable applications. *Basque International Workshop on Information Technology*, 1995.
