Abstract—Simulation of large-scale networks of spiking neurons has become appealing for understanding the computational principles of the nervous system by producing models based on biological evidence. In particular, networks that can assume a variety of (dynamically) stable states have been proposed as the basis for different behavioural and cognitive functions.

This work focuses on implementing the Neural Engineering Framework (NEF), a formal method for mapping attractor networks and control-theoretic algorithms to biologically plausible networks of spiking neurons, on the SpiNNaker system, a massive programmable parallel architecture oriented to the simulation of networks of spiking neurons. We describe how to encode and decode analog values to patterns of neural spikes directly on-chip. These methods take advantage of the full programmability of the ARM968 cores constituting the processing base of a SpiNNaker node, and exploit the fast Network-on-chip for spike communication.

In this paper we focus on the fundamentals of representing, transforming and implementing dynamics in spiking networks. We show real time simulation results demonstrating the NEF principles and discuss advantages, precision and scalability. More generally, the present approach can be used to state and test hypotheses with large-scale spiking neural network models for a range of different cognitive functions and behaviours.

I. INTRODUCTION

Construction of large-scale spiking neural models is possible thanks to the emergence of unified approaches that are able to scale up seamlessly. These models can be simulated taking advantage of recent developments in computational infrastructure that can equally be scaled up. Some models aim to find emerging functions from the structural data known from biology. For example, quantitative descriptions of cortex based on anatomical data [4] can be used to model systems that naturally scale up [19], due to the regularity of the laminar organization of the thalamo-cortical system [35]. Other approaches can be considered more functional, where neural dynamics and quantities act as biological constraints in modelling specific cognitive functions [7]. Some functions can be modelled using attractor networks [1], networks that can represent information by settling to a (dynamically) stable state with their self-sustained, persistent activity. For example functions like memory can be associated to brain areas that are believed to use attractor representation such as the hippocampus [37].

Simulating large scale networks of biologically plausible neurons is a challenging task which require scalable compu-

tational and communication resources. Therefore simulations usually take place on supercomputers [2], general purpose hardware as FPGAs [24] or dedicated neuromorphic hardware [28] [36]: every approach has different scalability, programmability, precision and power consumption characteristics.

In this context we describe how to map the principles of the Neural Engineering Framework (NEF) [10], a unified approach for implementing complex neuro-dynamical systems and mapping control-theoretic algorithms with the neural connections between a highly heterogeneous population of spiking neurons, to the SpiNNaker System [13], a massively parallel programmable architecture oriented to the simulation of large scale models of spiking neural networks.

The paper describes the approach taken to encode and decode values directly on-chip, taking advantage of the programmability of the SpiNNaker system and exploiting the fast on-chip spike-based interconnect for communication between neural populations.

We show how a variety of networks can be built using encoding/decoding methods. In short, the approach presents the basis for testing large-scale neural models built with the NEF integrating SpiNNaker as the computational back-end in the existing framework and tools.

The rest of the paper is structured as follows: we introduce the Neural Engineering Framework and the SpiNNaker System in the first two sections. We then present the approach used to port the NEF on SpiNNaker, and present results obtained with the approach in sections IV and V respectively. Finally, discussion about how to expand the work and conclusions are drawn in the last two sections.

II. NEURAL ENGINEERING FRAMEWORK

The Neural Engineering Framework [10] describes how biologically relevant variables can be encoded and processed in the dynamic neural activity of recurrently connected networks. This approach can be used to introduce complex control theoretic models into spiking neural networks, including standard attractor network models [8]. The NEF is captured by three principles:

- 1) **Representation** in neurons is defined by the combination of nonlinear encoding (exemplified by neuron tuning curves) and weighted linear decoding.

Real Time On Chip Implementation Of Dynamical Systems With Introduction

In the digital age, access to information has become easier than ever before. The ability to download Real Time On Chip Implementation Of Dynamical Systems With has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Real Time On Chip Implementation Of Dynamical Systems With has opened up a world of possibilities. Downloading Real Time On Chip Implementation Of Dynamical Systems With provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Real Time On Chip Implementation Of Dynamical Systems With has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Real Time On Chip Implementation Of Dynamical Systems With. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Real Time On Chip Implementation Of Dynamical Systems With. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize

reputable websites that prioritize the legal distribution of content. When downloading Real Time On Chip Implementation Of Dynamical Systems With, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Real Time On Chip Implementation Of Dynamical Systems With has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Real Time On Chip Implementation Of Dynamical Systems With Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer webbased readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Real Time On Chip Implementation Of Dynamical Systems With is one of the best book in our library for free trial. We provide copy of Real Time On Chip Implementation Of Dynamical Systems With in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Real Time On Chip Implementation Of Dynamical Systems With. Where to download Real Time On Chip Implementation Of Dynamical Systems With online for free? Are you looking for Real Time On Chip Implementation Of Dynamical Systems With PDF? This is definitely going to save you time and cash in something you should think about. If you trying to find then search around for online. Without a doubt there are numerous these available and many of them have the freedom. However without doubt you receive whatever you purchase. An alternate way to get ideas is always to check another Real Time On Chip Implementation Of Dynamical Systems With. This method for see exactly what may be included
