Metaphysics Theodor W. Adorno, Rolf Tiedemann, 2002-10-01 This volume makes available in English for the first time the famed lectures on metaphysics by one of the founders of the Frankfurt School of Critical Theory and one of the most influential thinkers of the 20th century It provides a unique introduction not only to metaphysics but also to Adorno's own intellectual standpoint

Metaphysics Stephen Mumford, 2012-08-30 Metaphysics is one of the traditional four main branches of philosophy alongside ethics logic and epistemology It is also an area that continues to attract and hold a fascination for many people yet it is associated with being complex and abstract For some it is associated with the mystical or religious For others it is known through the metaphysical poets who talk of love and spirituality This Very Short Introduction goes right to the heart of the matter getting to the basic and most important questions of metaphysical thought in order to understand the theory What are objects Do colours and shapes have some form of existence What is it for one thing to cause another rather than just being associated with it What is possible Does time pass By using these questions to initiate thought about the basic issues around substance properties changes causes possibilities time personal identity nothingness and emergentism Stephen Mumford provides a clear and simple path through this analytical tradition at the core of philosophical thought

Introduction to Metaphysics Jean Grondin, 2012-01-31 Jean Grondin completes the first history of metaphysics and respects both the analytical and the Continental schools while transcending the theoretical limitations of each He reviews seminal texts by Parmenides Plato Aristotle Plotinus and Augustine He follows the theological turn in the metaphysical thought of Avicenna Anselm Aquinas and Duns Scotus and he revisits Descartes and the cogito Spinoza and Leibniz's

rationalist approaches Kant's reclaiming of the metaphysical tradition and post-Kantian practice up to Hegel. He engages with twentieth-century innovations that upended the discipline, particularly Heidegger's revival of the question of Being and the rediscovery of the metaphysics of existence by Sartre and the Existentialists, language by Gadamer and Derrida, and transcendence by Levinas. Metaphysics is often dismissed as a form or epoch of philosophy that must be overcome yet by promoting a full understanding of its platform and processes. Grondin reveals its cogent approach to reality and foundational influence on modern philosophy and science. By restoring the value of metaphysics for contemporary audiences, Grondin showcases the rich currents and countercurrents of metaphysical thought and its future possibilities.

An Elementary Christian Metaphysics Joseph Owens, 1985. Joseph Owens presents an introduction to metaphysics designed to develop in the reader a habitus of thinking. Using original Thomistic texts and Etienne Gilson's interpretation of St. Thomas Aquinas, Owens examines the application of metaphysical principles to the issues that arise in a specifically Christian environment. **An Elementary Christian Metaphysics** focuses on questions of existence and the nature of revealed truths. Following his historical introduction to metaphysics, Owens provides a general investigation of the first principles and causes of being and also a study of knowledge and of the divine nature and attributes in light of natural reason. Irrespective of one's intellectual genotype, an exposure to the sustained developmental elucidation of Aquinas's insights executed by an author such as Owens can only enhance any metaphysical approach to reality. **The New Scholastic: An Elementary Christian Metaphysics** is intended primarily for undergraduate students as an introduction to metaphysics. The scope of the metaphysical study pursued by Owens includes not only a general investigation of beings but also an analysis of knowledge, epistemology, and of the divine nature, all in light of natural reason. **Studies in Religion** Joseph Owens, 1908-2005. Taught philosophy at the Pontifical Institute of Mediaeval Studies and the University of Toronto for forty years. He is the author of a number of books, including **An Interpretation of Existence**, also published by the University of Notre Dame Press.

Liaisons Alvin I. Goldman, 1992. These essays by a major epistemologist reconfigure philosophical projects across a wide spectrum from mind to metaphysics, from epistemology to social power. Several of Goldman's classic essays are included along with many newer writings. Together, these trace and continue the development of the author's unique blend of naturalism and reliabilism.

Philosophical Foundations for a Christian Worldview J. P. Moreland, William Lane Craig, 2003-03-31. Arguments are clearly presented and rival theories are presented with fairness and accuracy. **BOOK JACKET**

Metaphysics and Cognitive Science Alvin I. Goldman, Brian P. McLaughlin, 2019-03-27. This volume illustrates how the methodology of metaphysics can be enriched with the help of cognitive science. Issues to which results from cognitive science are brought to bear include the metaphysics of time, of morality, of meaning, of modality, of objects, and of natural kinds, as well as whether God exists.

An Introduction to Metaphysics Jack S. Crumley II, 2021-12-09. **An Introduction to Metaphysics** offers an engrossing survey of central metaphysical topics, including truth, universals, the nature of mind, personal identity, free will, time, and the existence of God.

The book is pitched at an intermediate undergraduate level and is suitable for students without background knowledge in these areas. Topically organized, it examines a variety of historical and contemporary positions relevant to each of the included themes. Memorable and amusing drawings by Gillian Wilson are interspersed throughout the text to illustrate concepts and examples.

Presents an accessible up to date and broad ranging survey of one of the most dynamic and often daunting sub fields in contemporary philosophy. [The method of science and its application to metaphysics. The rules of philosophising. Psychological principles. The limitations of knowledge](#) George Henry Lewes, 1874 **Science and Metaphysics** Wilfrid Sellars, 1968

Kant: Groundwork of the Metaphysics of Morals Immanuel Kant, 1998-04-23

Immanuel Kant's *Groundwork of the Metaphysics of Morals* ranks alongside Plato's *Republic* and Aristotle's *Nicomachean Ethics* as one of the most profound and influential works in moral philosophy ever written. In Kant's own words, its aim is to search for and establish the supreme principle of morality: the categorical imperative. Kant argues that every human being is an end in himself or herself, never to be used as a means by others, and that moral obligation is an expression of the human capacity for autonomy or self-government. This edition presents the acclaimed translation of the text by Mary Gregor, together with an introduction by Christine M. Korsgaard that examines and explains Kant's argument.

The Concept of World from Kant to Derrida Sean Gaston, 2013-09-20

In the mid-eighteenth century, metaphysics was broadly understood as the study of three areas of philosophical thought: theology, psychology, and cosmology. This book examines the fortunes of the third of these formidable metaphysical concepts: the world. Sean Gaston provides a clear and concise account of the concept of world from the mid-eighteenth century to the end of the twentieth century, exploring its possibilities and limitations and engaging with current issues in politics and ecology. He focuses on the work of five principal thinkers: Kant, Hegel, Husserl, Heidegger, and Derrida, all of whom attempt to establish new grounds for seeing the world as a whole. Gaston presents a critique of the self-evident use of the concept of world in philosophy and asks whether one can move beyond the need for a world-like vantage point to maintain a concept of world. From Kant to the present day, this concept has been a problem for philosophy, and it remains to be seen if we need a new Copernican revolution when it comes to the concept of world.

Form and Reason Edward Halper, 1993-08-03

This book uses the study of philosophical texts to raise and explore metaphysical issues. On one level, each essay addresses a scholarly issue in a classical text, often a text of Aristotle's. On a deeper level, the

issues Halper considers are metaphysical However unlike thinkers who have brought linguistic analysis and contemporary metaphysical notions to these texts Halper approaches them to find their formulations of issues and their strategies of pursuit Halper is not concerned with the defense of metaphysical commitments but with finding and exploring paths of metaphysical inquiry The essays in this volume are exploratory and exegetical rather than decisive Their contribution to metaphysics lies in the issues they raise the methods they explore and their conception of metaphysics as a discipline rooted in philosophical problems

Metaphysics: A Guided Tour for Beginners Tomasz Bigaj, 2012-01-02 This book contains a concise introduction to one of the most fundamental branches of philosophy which deals with reality and its nature Among the topics discussed are such metaphysical questions as Are we fundamentally free Does time really pass Are there any abstract objects What is causation What are necessary and possible truths The book is aimed at absolute novices with no previous knowledge of philosophy

The Metaphysics of Self and World Elie Maynard Adams, 1991 A great fissure occurred in Western civilization in the early modern period with the divorce between the humanities and the sciences and the rise of scientific naturalism The Metaphysics of Self and World is a philosophical exploration of the relationship between the individual the culture and the world It is in the author's words a philosophy of the humanities a philosophy of humanity and a philosophy of social reality It explores the implications of a world view that would integrate the perspective of the sciences with humanistic ways of thought E M Adams claims that we do violence to ourselves as human beings by trying to fit into the world as delineated in scientific categories Rejecting cultural subjectivism and scientific naturalism he argues for the irreducibility and validity of the categories of the humanities and for a fully developed humanistic philosophy of self and world In generating this world view he utilizes the humanities as a source of culture therapy in order to close the fissure in Western civilization Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina Chapel Hill He has written numerous books and articles and a festschrift celebrating his work Mind Value and Culture Essays in Honor of E M Adams edited by David Weissbord was published in 1989

Metaphysics Takatura Ando, 1963 No Science is subject to such contrary evaluations as metaphysics The number of its admirers is matched by the number of its denigrators and the final outcome hardly seems to be predictable Such instability is admittedly natural to a position of great honour But the problem is not as Kant considered it just a matter of the ability of metaphysics to perform its task What is most perplexing is that we cannot find any single definition of metaphysics common to both its admirers and its denigrators So as to shed some light on this confusion the present inquiry aims at concise survey of the usage of the term Publisher
