Common Sense for Modern Times: How to Use AI in Daily Life Niharika Singh, Prof. Dr. Punit Goel, Dr. Subodh Sachan, Dr. K Yogesh, 2026-03-08 We live in a time when artificial intelligence has quietly moved from research labs into the rhythm of everyday life It suggests what we read guides how we travel influences what we buy and increasingly shapes how we work learn and communicate Yet for all its growing presence AI remains widely misunderstood either celebrated as a miracle solution or feared as a disruptive force beyond human control This book begins from a simple belief neither hype nor fear is useful without understanding and no technology can replace common sense Common Sense for Modern Times How to Use AI in Daily Life is written for everyday users not engineers not policymakers but ordinary people navigating a rapidly changing world It does not attempt to turn readers into AI experts Instead it aims to help them become wise users of intelligent tools grounded in judgment ethics and human values At its core this book argues that common sense has not become obsolete in the age of AI it has become more important than ever While machines can process data at extraordinary speed they lack lived experience moral responsibility emotional understanding and contextual awareness These uniquely human qualities are essential when technology begins to influence daily decisions relationships and opportunities The challenge of modern life is not whether to use AI but how to use it thoughtfully This book takes a balanced and practical approach It explains AI in clear non technical language stripping away exaggerated claims and unnecessary fear It explores how AI fits into everyday spaces homes workplaces education and social life while consistently reminding readers that technology should support human goals not redefine them Throughout the chapters readers are encouraged to question recommendations reflect on consequences and remain accountable for decisions influenced by AI Another key purpose of this book is to reconnect technology with ethics AI systems are created by humans trained on human data and deployed within human societies As a result they inevitably reflect human values assumptions and biases Understanding this reality empowers users to demand transparency protect privacy and resist blind automation Ethical AI use is not the responsibility of developers alone it begins with informed and responsible users The book also looks ahead As AI becomes more deeply integrated into education work and governance the next generation will need more than technical skills They will need critical thinking adaptability empathy and ethical awareness Building AI literacy alongside human values is essential for a future where technology enhances dignity fairness and well being rather

than undermining them This is not a book about resisting progress It is a book about guiding progress wisely It recognizes the immense potential of AI to reduce effort expand access to knowledge and improve quality of life At the same time it insists that progress without reflection can lead to dependence loss of judgment and erosion of responsibility Ultimately Common Sense for Modern Times is an invitation to slow down think clearly and use technology with intention The future will undoubtedly include smarter machines Whether it also includes wiser humans depends on the choices we make today
