Common Ground in First Language and Intercultural Interaction Istvan Kecskes,2023-03-06 In recent years the traditional approach to common ground as a body of information shared between participants of a communicative process has been challenged Taking into account not only L1 but also intercultural interactions and attempting to bring together the traditional view with the egocentrism based view of cognitive psychologists it has been argued that construction of common ground is a dynamic emergent process It is the convergence of the mental representation of shared knowledge that we activate assumed mutual knowledge that we seek and rapport as well as knowledge that we co construct in the communicative process This dynamic understanding of common ground has been applied in many research projects addressing both L1 and intercultural interactions in recent years As a result several new elements aspects and interpretations of common ground have been identified Some researchers came to view common ground as one component in a complex contextual information structure Others analyzing intercultural interactions pointed out the dynamism of the interplay of core common ground and emergent common ground The book brings together researchers from different angles of pragmatics and communication to examine i what adjustments to the notion of common ground based on L1 communication should be made in the light of research in intercultural communication ii what the relationship is between context situation and common ground and iii how relevant knowledge and content get selected for inclusion into core and emergent common ground
