Diversity and Complexity Scott E. Page, 2010-11-08 This book provides an introduction to the role of diversity in complex adaptive systems A complex system such as an economy or a tropical ecosystem consists of interacting adaptive entities that produce dynamic patterns and structures Diversity plays a different role in a complex system than it does in an equilibrium system where it often merely produces variation around the mean for performance measures In complex adaptive systems diversity makes fundamental contributions to system performance Scott Page gives a concise primer on how diversity happens how it is maintained and how it affects complex systems He explains how diversity underpins system level robustness allowing for multiple responses to external shocks and internal adaptations how it provides the seeds for large events by creating outliers that fuel tipping points and how it drives novelty and innovation Page looks at the different kinds of diversity variations within and across types and distinct community compositions and interaction structures and covers the evolution of diversity within complex systems and the factors that determine the amount of maintained diversity within a system Provides a concise and accessible introduction Shows how diversity underpins robustness and fuels tipping points Covers all types of diversity The essential primer on diversity in complex adaptive systems

Complexity and Diversity K. Kudo, O. Yamakawa, Y. Tamagawa, 2012-12-06 Nonlinear complex open systems show great diversity in the process of self organization and that diversity increases as complexity increases The measurement of complexity and the origins of the diversity of such complex systems are the focus of interdisciplinary studies extending across a wide range of scientific disciplines that include applied mathematics physics chemistry biology psychology ecology sociology and economics Previous investigations have concentrated either on complexity or on diversity but not both This volume makes clear the relation between complexity and diversity with examples drawn from various disciplines Compiles here are presentations from the Complexity and Diversity workshop held in Fugue Japan in August 1996 The contributions are the results of research in mathematical systems physical systems living systems and social systems and are contained in the four corresponding sections of the book Mathematical expressions for the theory of complexity as a fundamental method along with realistic examples for application of systematic methods provide the reader with ready access to the latest topics in complex systems

Biology's First Law Daniel W. McShea, Robert N. Brandon, 2010-07-15 Life on earth is characterized by three striking phenomena that demand explanation adaptation the marvelous fit between organism and environment diversity the great variety of organisms and complexity the enormous intricacy of their internal structure Natural selection explains adaptation But what explains diversity and complexity Daniel W McShea and Robert N Brandon argue that there exists in evolution a spontaneous tendency toward increased diversity and complexity one that acts whether natural selection is present or not They call this tendency a biological law the Zero Force Evolutionary Law or ZFEL This law unifies the principles and data of biology under a single framework and invites a reconceptualization of the field of the same sort that Newton s First Law brought to physics Biology s First Law shows how the ZFEL can be applied to the study of diversity and complexity and examines its wider implications for biology Intended for evolutionary biologists paleontologists and other scientists studying complex systems and written in a concise and engaging format that speaks to students and interdisciplinary practitioners alike this book will also find an appreciative audience in the philosophy of science

Davis, 1979 An innovative approach to legislative study this volume views the Kansas legislature from the perspective of organization theory Authors Marvin A Harder and Raymond G Davis examine the technical and procedural aspects of the legislature that most scholars have overlooked They provide a careful precise theoretical study of the organization and structure administrative and staff relationships and formal processes of the legislature Applying the concepts of organization theory Harder and Davis describe and analyze how the Kansas legislature works They cover the legislative staff the networks of communication and socialization the role of leadership the committees and the legislative functions of lawmaking and of overseeing They also discuss recent changes in the legislature and give a profile of the legislators This book breaks new ground by focusing on organization theory rather than political analysis to explain the dynamics of legislative operations Of particular value to Kansas legislators and students of Kansas legislative process it will also contribute to the general literature about American legislative institutions *Software-Intensive Systems and New Computing Paradigms* Martin Wirsing, Jean-Pierre Banatre, Matthias Hözl, Axel Rauschmayer, 2008-11-06 This volume presents results of three workshops of the InterLink working group setup by the EU to look at software intensive systems and novel computing paradigms It covers ensemble engineering theory and formal methods and novel computing paradigms *The Mesolithic Hunters of the Trentino* Royston Clark, 2000 This volume offers a contribution to the understanding of Mesolithic settlement and subsistence change through a regional case study of archaeological data from the Trentino a mountain region in northern Italy Excavations in this region have identified rock shelter deposits extending throughout the Mesolithic period containing comparatively well preserved animal bone assemblages as well as lithic material The basis of this study is that in order to understand hunter gatherer sites it is necessary to examine both animal bone assemblages and lithic material in the form of stone tools and the residue associated with their manufacture These represent the main archaeological evidence recorded from valley bottom rock shelter and open air high altitude sites in the Trentino The combined study of animal bones and lithics together with long term and spatial perspectives provides a framework for then extending the scale of analysis from site based to regional in scale *I Think Therefore I Am ...
