SoulTypes Robert Norton, Richard Southern, 2004-03-19 We are all wired for God but our needs inclinations and personalities are all different Using the metaphor of spiritual DNA SoulTypes will help you assess your own inborn qualities and find a spiritual path that will support your quest for a richer fuller more integrated life If you consider yourself spiritual but not religious SoulTypes will help you discover just what works for you With its inventory and assessment to guide you to discover and interpret your spiritual type SoulTypes helps you in answering the most profound questions Who am I What is my authentic identity What s important to me What are my values my gifts my passions Why am I here What is my purpose or mission in life Where am I going What is my vision of my future

About Life Paul S. Agutter, Denys N. Wheatley, 2007-03-06 Thanks to the popular media and to books by Dawkins Fortey Gould Margulis and other writers people are informed about many aspects of biology Everyone seems to know a little about evolution for example and about DNA and the possibilities good and bad afforded by research in molecular genetics Most people know some of the arguments for and against the likelihood of life on other planets And so on We are glad that these pieces of information have become so widely available However we do not assume any particular knowledge other than the most basic in this book Our aim is to address general questions rather than specific issues We want to enable our readers to join their disparate pieces of knowledge about biology together The most basic of these general questions and perhaps the most difficult can be expressed in beguilingly simple words What is life What does modern biology tell us about the essential differences between living organisms and the inanimate world An attempt to answer this question takes us on a journey through almost the whole of contemporary cell and molecular biology which occupies the first half of the book The journey is worth the effort The provisional answer we attain provides a coherent unifying context in which we can discuss evolution the origin of life extraterrestrial life the meaning of intelligence the evolution of the human brain and the nature of mind
