**Forest Industries Review** ,1979    **Combating Climate Change** National Assessment of UK Forestry and Climate Change Steering Group,2009 This assessment presents a science based analysis of the current and potential capabilities of the UK s forests and forest products to contribute to the mitigation of climate change It shows unequivocally that 1 a significant contribution to mitigation could be made by maintaining and increasing the rates at which CO2 is removed from the atmosphere by the UK s forests the abatement of emissions 2 there are other major contributions that forests and trees can make for example in urban environments and 3 that there are areas where substantial research is required to assess and reduce impacts and to develop the contribution of UK forestry to the mitigation of and adaptation to climate change The report follows the IPCC convention of identifying key findings at the start of each chapter Authors have also identified research priorities at the end of their respective chapters and these proposals require serious and urgent consideration Gaps in understanding are identified and in some instances there is a clear requirement for more scientific evidence in order that uncertainties in the projected impacts of climate change can be reduced The driver in the new research programmes will be the need to enhance the contribution that UK trees and woodlands can make to a low carbon economy It is the expressed intention of the report to provide the detailed evidence required to achieve sustainable forest management under what will be complex and changing climatic circumstances    **Subject Guide to Books in Print** ,1984    Scientific and Technical Books and Serials in Print ,1984    **McCulloch Chain Saws for 1957** McCulloch Corporation,1957    *McCulloch Chainsaw B P I.* ,1963    *I.
