The Analytics of Risk Model Validation George A. Christodoulakis, Stephen Satchell, 2007-11-14 Risk model validation is an emerging and important area of research and has arisen because of Basel I and II These regulatory initiatives require

trading institutions and lending institutions to compute their reserve capital in a highly analytic way based on the use of internal risk models It is part of the regulatory structure that these risk models be validated both internally and externally and there is a great shortage of information as to best practise Editors Christodoulakis and Satchell collect papers that are beginning to appear by regulators consultants and academics to provide the first collection that focuses on the quantitative side of model validation The book covers the three main areas of risk Credit Risk and Market and Operational Risk Risk model validation is a requirement of Basel I and II The first collection of papers in this new and developing area of research International authors cover model validation in credit market and operational risk *The Bibliographic Index* ,2005
