Early Childhood Education in the 21st Century Hani Yulindrasari, Vina Adriany, Yeni Rahmawati, Fonny Hutagalung, Sarita Gálvez, Ade Gafar Abdullah, 2019-09-24
Providing a selection of papers presented at ICECE 2018 a biennial conference organised by the Early Childhood Education Program Universitas Pendidikan Indonesia The conference s general theme was Finding Alternative Approaches Theories Frameworks and Practices of Early Childhood Education in the 21st Century Distinct from other periods of time the 21st century is characterised by so much knowledge easy to access but hard

to grasp borderless and hyper connected society mediated by the internet high competitiveness not only within a country but across countries high mobility and widening economic discrepancy as neoliberalism has strengthened its influence on every sector of human life The children of today will face many things that have not yet been invented or discovered sometimes beyond expectations Scholars and teachers of early childhood education need to be aware of these astonishing changes The way children and childhood are seen cannot stay the same and so does the way children of this century are educated The conference opened a discussion about finding alternative approaches theories and best practices of early childhood education for a rapidly changing and globalised society

Epistemic Thought Experiments and Intuitions Manhal Hamdo, 2023-06-28

This work investigates intuitions nature demonstrating how philosophers can best use them in epistemology First the author considers several paradigmatic thought experiments in epistemology that depict the appeal to intuition He then argues that the nature of thought experiment generated intuitions is not best explained by an a priori Platonism Second the book instead develops and argues for a thin conception of epistemic intuitions The account maintains that intuition is neither a priori nor a posteriori but multi dimensional It is an intentional but non propositional mental state that is also non conceptual and non phenomenal in nature Moreover this state is individuated by its progenitor namely the relevant thought experiment Third the author provides an argument for the evidential status of intuitions based on the correct account of the nature of epistemic intuition The suggestion is the fitting ness approach intuition alone has no epistemic status Rather intuition has evidentiary value as long as it fits well with other pieces into a whole namely the pertinent thought experiment Finally the book addresses the key challenges raised by supporters of anti centrality according to which philosophers do not regard intuition as central evidence in philosophy To that end the author responds to them showing that they fail to affect the account of intuition developed in this book This text appeals to students and researchers working in epistemology
