technology during the last five years are reported in this volume However despite acknowledged developments and an  
enormous investment by the Computer Aided Design CAD vendor industry and others commercial framework products have  
been slow to appear on the market Further those which have appeared have largely failed to meet original targets whether in  
terms of scope or performance or both Reaching a consensus on new international standards has been a painfully slow  
process with rapid advances in technology often rendering new standards out of date even before their eventual appearance  
A motivation for agreement on technical issues not yet fully understood or researched will be vital if a commercial basis to
