Mathematical Reasoning Level B 06907bbp, Douglas K. Brumbaugh, Linda Brumbaugh, 2007-01-18 Mathematical Reasoning helps your child devise strategies to solve a wide variety of math problems. These books emphasize problem solving and computation to build the math reasoning skills necessary for success in higher level math and math assessments. All books are written to the standards of the National Council of Teachers of Mathematics. These highly effective activities take students far beyond drill and practice by using step by step discussion based problem solving to develop a conceptual bridge between computation and the reasoning required for upper level math. Activities and units spiral slowly allowing students to become comfortable with concepts but also challenging them to continue building their math skills.

It is important to arouse each student's curiosity by presenting mathematics in fresh and stimulating ways that are captivating and motivating. The ideas presented in this book are designed to help students become powerful mathematics thinkers and to help them make sense out of mathematics. Based on the NCTM Standards and NCTM's new Focal Points, we have emphasized Number and Operations, Algebra, Geometry, Measurement and Data Analysis, and Probability.
