Trucking in the Age of Information Dale Belman, Chelsea White, 2018-01-18. *Trucking in the Age of Information* provides a comprehensive overview of the contemporary trucking industry. Prior research on trucking has focused on the effects of deregulation on the industry, but the industry's current transformation is driven by information technology, emerging business strategies, globalization of commodity production, and the rise of package express and logistics. The volume brings together acknowledged and emerging scholars of the industry, including Thomas Corsi (University of Maryland), Chelsea White III (Georgia Tech), Starr McMullen (Oregon State University), Will Mitchell (Duke University), Jeff Liker (University of Michigan), Francine LaFontaine (University of Michigan), Kristen Monaco (California State University at Long Beach), and Michael Conyngham (International Brotherhood of Teamsters), to address issues including technological change, third party logistics, lean trucking, driver safety and health, homeland security, and the consolidation of trucking services. Each chapter provides an overview of industry issues and a discussion of current research.

State of Logistics Outsourcing Capgemini, John Langley jr, 2012 **2015 Third-party Logistics Study** Capgemini, 2015 *2018 third-party logistics study* Infosys consulting, John Langley jr, 2017 *State of Logistics Outsourcing* Capgemini Consulting, 2012 **Logistics Management**, 1997 **Third Party Logistics** Madhu Ranjan, Richard Tonui, 2004. An important topic in the Third Party Logistics (3PL) industry is the extent to which customers view 3PL services as pure commodities to be re-bid. The trend towards

commoditization has been one of the causes for current pricing pressures on the 3PLs The 3PLs gearing towards strategic partnerships and the addition of Value Added Services to their portfolio could decelerate the trend towards commoditization and could also otherwise differentiate them from their competitors This study investigates the categories of relationships that 3PLs have and specifically the presence of strategic relationships in the 3PL industry The study also examines the contexts in which they exist and highlights the factors that have contributed to the formation of the strategic relationships The study concludes by proposing steps that 3PLs can take to better position themselves as candidates for strategic relationships
