

Unit - IV Graph Theory

6.2. Basic terminology of a graph.

- A graph is simply a collection of points, called 'vertices' and a collection of lines, called 'Edges' each of which joins either a pair of points or a single point to itself.

Mathematically a graph G is an ordered pair (V, E) where V is the set of vertices & E is the set of edges. Each edge e_{ij} is associated with an unordered pair of vertices (v_i, v_j) . The vertices v_i and v_j are called end vertices or terminal vertices of the edge e_{ij} or simply the

edge e .

In above graph there are four vertices namely v_1, v_2, v_3 & v_4 & five edges e_1, e_2, e_3, e_4 & e_5 .

The end vertices of edge e_1 are v_1 & v_2 .

i.e.,

$$e_1 = (v_1, v_2)$$

Tool Kit for Groupoid C^ -Algebras* Dana P. Williams, 2019-09-24 The construction of a C algebra from a locally compact groupoid is an important generalization of the group C algebra construction and of the transformation group C algebra construction Since their introduction in 1980 groupoid C algebras have been intensively studied with diverse applications including graph algebras classification theory variations on the Baum Connes conjecture and noncommutative geometry This book provides a detailed introduction to this vast subject and is suitable for graduate students or any researcher who wants to use groupoid C algebras in their work The main focus is to equip the reader with modern versions of the basic technical tools used in the subject which will allow the reader to understand fundamental results and make contributions to various areas in the subject Thus in addition to covering the basic properties and construction of groupoid C algebras the focus is to give a modern treatment of some of the major developments in the subject in recent years including the Equivalence Theorem and the Disintegration Theorem Also covered are the complicated subjects of amenability of groupoids and simplicity results The book is reasonably self contained and accessible to graduate students with a good background in operator algebras
