A **data structure** is a special way of organizing and storing data in a computer so that it can be used efficiently. 1-**Linear or non-linear**: This characteristic describes whether the data items are arranged in **ordered sequence**, such as with an **array**, or in an **unordered sequence**, such as with a **graph**.

2-**Homogeneous or non-homogeneous**: This characteristic describes whether all data items in a given repository are of the same data type or of various types. for example- An **array** has **similar data type stored contiguously** but a **Structure** has **collection of different data types**.
