

READING COMPREHENSION

GRADE 5

READ AND DISCOVER

Directions: Read "The Pony Express" and answer the questions.

1. What was the primary purpose of the Pony Express?
 A delivering gold to California
 B providing horses for cowboys
 C cutting travel time for mail delivery
 D building stagecoaches
2. In which year did the Pony Express start its mail service?
 A 1830
 B 1845
 C 1850
 D 1870
3. How long did the Pony Express take to deliver mail from Missouri to California?

4. Why did the Pony Express use mules?
 A they were faster than horses
 B they were stronger than horses
 C they were easier to train
 D they were more available
5. What was the purpose of the mochila carried by riders?
 A holding mail
 B carrying food
 C providing protection
 D carrying tools
6. Why did the Pony Express use riders?
 A they were faster than stagecoaches
 B they were stronger than stagecoaches
 C they were easier to train
 D they were more available
7. How long did it take the Pony Express to deliver mail from Missouri to California?

THE PONY EXPRESS

Today, there are many ways to quickly send messages halfway across the world, whether it's a text, email, or even video chat. It is very easy for us to talk to people far away. That was not always the case. Long ago, people relied on the postal service to communicate with others.

In 1850, it took about 25 days to send a letter from one side of the United States to California. In those days, California was quickly growing. Thousands of people moved to California in hopes of finding gold. The problem was that because they moved so far away, it was hard to communicate with family and friends they had left behind on the other side of the country. It took a very long time to deliver messages, newspapers, and mail.

In 1850, three businessmen, William H. Russell, Alexander Majors, and William G. Waddell, made a solution. Together, they started the Pony Express. The Pony Express was a mail service that started in Joseph, Missouri. It stretched for 1,900 miles to Sacramento, California. Their goal was to cut the travel time in half. They wanted to be able to get a letter from Missouri to California in only 10 days. Many people thought this was impossible.

The three men knew that having riders instead of stagecoaches would be much faster and easier. They hired 120 riders and bought 400 horses. They also built 154 stations. Riders had to be under 125 pounds so that the horses didn't have to carry a heavy load. The riders were only allowed to take a gun for protection, some food, and their mochila.

The mochila (Spanish for backpack) was a pouch that carried the letters. Each pouch could hold up to 20 pounds of mail. There was a station every ten miles along the 1,900-mile route. The riders would ride a horse of full speed from one station to the next. They would then switch to a fresh horse and ride the next leg. They would ride both day and night.

Even though it worked well, the Pony Express only lasted for 19 months. Part of the reason was that it was very expensive to send a letter through the Pony Express. At first, the price was \$5 per 1/2 ounce. That would be about \$130 in today's money. The price was lowered, but a lot of people still couldn't afford it. The invention of the telegraph also caused the Pony Express to end. The telegraph allowed instant communication across the country. The Pony Express couldn't compete with that. On October 26, 1861, the Pony Express closed. This was just two days after the announcement of the transcontinental telegraph.

The Pony Express was an amazing service. It may seem very old-fashioned to us. When you think about it, though, it should make us much more thankful for the quick ways that we can communicate with people all over the world today.

web block diagram of ofc system the light beam pulses are then fed into a fiber optic cable where they are transmitted over long distances at the receiving end a light sensitive device known as a photocell or light detector is used to detect the light pulses

elements of fiber optic communication link block diagram of optical - Jan 08 2023

web jan 27 2021 in this video key elements block diagram of the optical fiber communication system are explained the basic elements in block diagram of the fiber optic

optical fiber communication block diagram types applications - Jul 14 2023

web block diagram of optical fiber communication system fiber optic communication link is the transmission of information by the propagation of the optical signal through optical fibers over a required distance

optical fiber construction characteristics modes block diagram - Feb 26 2022

web optical fiber construction characteristics modes block diagram uses home electronics communication system optical fiber the transmission media used for the communication of signals from one point to another are copper wires coaxial cables wave guides and radio links all these media have their own advantages and

block diagram of optical communication system pdf optical fiber - Aug 03 2022

web the general block diagram of optical fiber communication system is shown in the figure9 the source provides information in the form of electrical signal to the transmitter the electrical stage of the transmitter drives an optical source to

basic block diagram of optical communication system types - Aug 15 2023

web jan 15 2022 what is optical communication system an optical fiber is a thin flexible transparent cable that uses light quickly and efficiently to transmit data it operates on the total internal reflection principle light is used to communicate between optical fibers and not electricity and through the use of light communication speeds increase

optical fiber communication system block diagram - Jun 13 2023

web sep 28 2019 optical fiber communication system block diagram electrical transmitter contains electrical stage which drives an optical source to give modulation of light wave carrier optical source provides electrical to optical conversion can be led s on laser requirements are 1 high output power 2 high linearity 3

a brief introduction to optical fiber communication systems - Oct 05 2022

web feb 3 2021 optical fibers and cables constitute the transmission media through which light travels in an optical communication system low loss and high strength optical fibers with a high bandwidth are

unit 2 overview of optical fiber communication - Sep 04 2022

web basic block diagram of optical fiber communication system consists of following important blocks transmitter information channel receiver fig 1 2 1 shows block diagram of ofc system message origin generally message origin is from a transducer that converts a non electrical message into an electrical signal

block diagram of a basic optical fiber communication system - Jan 28 2022

web download scientific diagram block diagram of a basic optical fiber communication system using arduino uno from publication design and analysis of high speed data optical fiber communication
