Robots David E. Newton, 2018-09-07. *Robots: A Reference Handbook* differs from most other books on robotics in the variety of resources that it provides to readers of all ages. *Robots: A Reference Handbook* teaches readers about a wide variety of robots. It opens with a history of robotics dating to ancient Greece and Rome at which time an impressive array of automata were invented for entertainment, religious and instructional purposes. It follows the development of automata and robots in ancient China and the Islamic world through to Western Civilization in the present day. Subsequent chapters describe the wide array of applications to which robots are put today and discuss the technical, social, political, ethical and economic issues created by their increasing use. Additionally, a number of essays by interested individuals highlight various aspects of robotics development. The remaining chapters of the book provide resources that will assist readers in learning more about the topic of robotics.

[China's Long March of Modernisation](#) Khor Eng Lee, Aaron Khor, 2019-12-11. With the support of its strong leadership and industrious population of close to one billion working Chinese, fully committed and dedicated to its peaceful development and comprehensive modernization, China is forging ahead on the driver's seat in various fields of human endeavour. A leading global role is resourceful and resurgent New China's manifest destiny with the confidence of attaining and regaining the world's largest economy within the coming decade. Holding high the new banner of the Fourth Industrial Revolution (IR 4.0), China will continue steadfastly and strongly on its Long March of Modernization. In the military field, the People's Liberation Army (PLA) has developed from a ragtag fighting force of some 20,000 troops into a two million strong military that's presently rated as the world's third strongest after its counterparts in the US and Russia. Speaking at a grand rally to mark the 90th anniversary of the People's Liberation Army (PLA) at the Great Hall of the People in Beijing on 1 August 2017, President Xi Jinping said the PLA has transformed itself from a millet plus rifles single service force to one that has fully fledged services. Having basically completed its mechanization, the PLA is moving rapidly toward having strong informationized armed forces.

12. President Xi stressed that China must step up the PLA's transformation into a world class military that's ready to fight and win wars in defence of its national sovereignty.

13. To quote from the May 2017 Report by the US Department of Defense: The PLA is pursuing an ambitious modernization program that aligns with China's two centenary goals. DIA Defense Intelligence Agency director Lieutenant General Robert Ashley emphasized that China Military Power 2019, published and released by the DIA on 15 January 2019, showed China's evolution from a domestically oriented force to a global one. He told reporters the PLA was changing from a defensive, inflexible ground based force charged with domestic and peripheral security responsibilities to a joint, highly agile, expeditionary and power projecting arm of Chinese foreign policy that engages in military diplomacy and operations across the globe.
