Introduction to Industrial Gas Cleaning F. A. L. Dullien,1989 Introduction to Industrial Gas Cleaning evolved from a set of typewritten class notes for teaching at the University of Waterloo which were revised over a period of almost ten years The course is Air Pollution Control Throughout the book great care has been taken to define the terms used to explain the physical and chemical principles to state the assumptions made and to go through the mathematical developments in detail This approach to the subject has resulted in a rather rigorous treatment which at the same time is readable *Subject Guide to Books in Print* ,2001

Introduction to Environmental Engineering Mackenzie Leo Davis,David A. Cornwell,1998 Introduction to Environmental Engineering 4 e contains the essential science and engineering principles needed for introductory courses and used as the basis for more advanced courses in environmental engineering Updated with latest EPA regulations Davis and Cornwell apply the concepts of sustainability and materials and energy balance as a means of understanding and solving environmental engineering issues With 650 end of chapter problems as well as provocative discussion questions and a helpful list of review items found at the end of each chapter the text is both a comprehensible and comprehensive tool for any environmental engineering course Standards and Laws are the most current and up to date for an environmental engineering text
