Tool support for collaborative creation of interactive storytelling media Paula Klinke, Silvan Verhoeven, Felix Roth, Linus Hagemann, Tarik Alnawa, Jens Lincke, Patrick Rein, Robert Hirschfeld, 2022-09-21 Scrollytellings are an innovative form of web content Combining the benefits of books images movies and video games they are a tool to tell compelling stories and provide excellent learning opportunities Due to their multi modality creating high quality scrollytellings is not an easy task Different professions such as content designers graphics designers and developers need to

collaborate to get the best out of the possibilities the scrollytelling format provides Collaboration unlocks great potential However content designers cannot create scrollytellings directly and always need to consult with developers to implement their vision This can result in misunderstandings Often the resulting scrollytelling will not match the designer s vision sufficiently causing unnecessary iterations Our project partner Typeshift specializes in the creation of individualized scrollytellings for their clients Examined existing solutions for authoring interactive content are not optimally suited for creating highly customized scrollytellings while still being able to manipulate all their elements programmatically Based on their experience and expertise we developed an editor to author scrollytellings in the lively next live programming environment In this environment a graphical user interface for content design is combined with powerful possibilities for programming behavior with the morphic system The editor allows content designers to take on large parts of the creation process of scrollytellings on their own such as creating the visible elements animating content and fine tuning the scrollytelling Hence developers can focus on interactive elements such as simulations and games Together with Typeshift we evaluated the tool by recreating an existing scrollytelling and identified possible future enhancements Our editor streamlines the creation process of scrollytellings Content designers and developers can now both work on the same scrollytelling Due to the editor inside of the lively next environment they can both work with a set of tools familiar to them and their traits Thus we mitigate unnecessary iterations and misunderstandings by enabling content designers to realize large parts of their vision of a scrollytelling on their own Developers can add advanced and individual behavior Thus developers and content designers benefit from a clearer distribution of tasks while keeping the benefits of collaboration
