[A Verification and Validation Procedure for Computational Fluid Dynamics Solutions](#) Michael P. Ebert, Joseph J. Gorski, 2001 This report presents the mechanics of performing a verification and validation analysis for practical problems focusing mainly on the estimation of uncertainty in the numerical prediction due to the use of finite grid sizes A detailed example is presented along with discussions regarding many of the practical issues involved in performing a rigorous verification and validation analysis The particular approach outlined in this report is mainly based on theoretical work performed at the Iowa Institute of Hydraulic Research This approach requires numerical solutions on 3 related grids however an alternative approach requiring solutions on only 2 grids is also demonstrated

Computational Techniques for Fluid Dynamics Karkenahalli Srinivas,Clive A.J. Fletcher,2012-12-06 This complementary text provides detailed solutions for the problems that appear in Chapters 2 to 18 of Computational Techniques for Fluid Dynamics CTFD Second Edition Consequently there is no Chapter 1 in this solutions manual The solutions are indicated in enough detail for the serious reader to have little difficulty in completing any intermediate steps Many of the problems require the reader to write a computer program to obtain the solution Tabulated data from computer output are included where appropriate and coding enhancements to the programs provided in CTFD are indicated in the solutions In some instances completely new programs have been written and the listing forms part of the solution All of the program modifications new programs and input output files are available on an IBM compatible floppy direct from C A J Fletcher Many of the problems are substantial enough to be considered mini projects and the discussion is aimed as much at encouraging the reader to explore extensions and what if scenarios leading to further development as at providing neatly packaged solutions Indeed in order to give the reader a better introduction to CFD reality not all the problems do have a happy ending Some suggested extensions fail but the reasons for the failure are illuminating
