Instructions for the Modified Jones

The modified Jones scale is the right of Jones is arranged in three levels. One end is five if the patient fails to respond satisfactorily to any items, marks the "0" at the left end of the scale. This score indicates that the patient had difficulty performing their particular skill. If the patient responds correctly and without difficulty on the items, mark "12." A score of "12" indicates clearly normal or functional behavior. The numbers between either extreme suggest some degree of abnormal function.

The test was normed on 108 healthy children in the age range from 3 to 7 years. The screening battery was used to assess several children with ACA and provided a profile of qualitative and quantitative of pre linguistic and linguistic impairments. This profile provides an objective basis for planning management and treatment. Re assessment produces objective outcome measures of changes in pre linguistic and linguistic function. The battery consists of 5 subtests of visual perception which involve matching objects shapes pictures and colours. One pre reading test requires matching letter like shapes. Six auditory language subtests involve selecting objects pictures colours animal action pictures and pictures of object by function. Tests for speech and language production include 4 pre speech tests where the child imitates tongue movements animal sounds speech sounds and counts aloud from one to ten. Language production tests include picture confrontation naming sentence formulation picture description and conversational responses. Additionally there are drawing copying and gestural tests.
