Language Transfer in Language Learning Susan M. Gass, Larry Selinker, 1983 **Language Transfer in Language Learning** Susan M. Gass, Larry Selinker, 1992 **Georgetown University Round Table on Languages and Linguistics (GURT) 1996: Linguistics, Language Acquisition, and Language Variation** James E. Alatis, 1996-08-15 This volume examines linguistics language acquisition and language variation emphasizing their implications for teacher education and language education A majority of the essays consider issues in second language acquisition dealing specifically with learners and instructors or concentrating on the larger social and societal context in which learning and acquisition occur Topics highlighted include the current and often controversial debate over bilingual education language variation and the past present and future role of linguistics in language pedagogy **Developmental and Clinical Pragmatics** Klaus P. Schneider, Elly Ifantidou, 2020-08-24 This handbook provides a comprehensive and up to date survey of a wide range of developmental and clinical issues in pragmatics Principally the contributions to this volume deal with pragmatic competence in a native language in a second or foreign language and in a selection of language disorders The topics which are covered

explore questions of production and comprehension on the utterance and discourse level Topics addressed concern the acquisition and learning teaching and testing assessment and treatment of various aspects of pragmatic ability knowledge and use These include for example the acquisition and development of speech acts implicatures irony story telling and interactional competence Phenomena such as pragmatic awareness and pragmatic transfer are also addressed The disorders considered include clinical conditions pertaining to children and to adults Specifically these are among others autism spectrum disorders Down syndrome and Alzheimer s disease

The Bilingual Mental Lexicon Longxing Wei,2019-11-13 This book proposes the Bilingual Lemma Activation Model as a method for exploring the nature and activity of the bilingual mental lexicon in both speech production and language acquisition This model claims that the bilingual s two languages are not equally activated in code switching one playing a crucial role in grammatical frame building and the other being activated at a lexical level due to psycholinguistic reasons To test this model the book analyzes bilingual speech data from naturally occurring intrasentential code switching instances involving various language pairs A second claim of this model is that code switching naturally occurs because certain lemmas underlying some particular lexical items stored in the bilingual mental lexicon are language specific and such lemmas are in contact in bilingual speech To further test this model second language acquisition data are analyzed here to describe and explain sources of language transfer at the level of abstract lexical structure Thus from some psycholinguistic perspectives this model views bilingual speech involving code switching and interlanguage performance data as predictable outcomes of bilingual systems in contact This book will appeal to graduate students and researchers in both theoretical and applied linguistics

Information Highlighting in Advanced Learner English Marcus Callies,2009 This book presents the first detailed and comprehensive study of information highlighting in advanced learner language echoing the

increasing interest in questions of near native competence in SLA research and contributing to the description of advanced interlanguages It examines the production and comprehension of specific means of information highlighting in English by native speakers and German learners of English as a foreign language presenting triangulated experimental and learner corpus data as corroborating evidence The study focuses on learners use of discourse pragmatically motivated variations of the basic word order such as inversion preposing and it and wh clefts an underexplored field in SLA research to date The book also provides a critical re assessment of the study of pragmatics within SLA It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmlinguistic abilities for understanding and performing speech acts Thus the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross cultural investigation of speech acts It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers language teachers and curriculum designers
