An Insider's Guide to Islam Yushau Sodiq, 2010-12 Islam the religion of total submission to God is the belief

of more than one fifth of all human beings and is the second largest religion in the world. Despite its large number of followers little was known about it in America until after the tragic event of September 11, 2001. Unfortunately the media portrayed Islam negatively after September 11th and distorted its true nature. Hence some people do not want to hear anything about Islam while many others began to ask many questions about it. An Insider's Guide to Islam is a practical guide that explains Islam as understood and practiced by Muslims of diverse background. To Muslims Islam is a way of life and a religion of peace which brings tranquility and harmony to their lives. Islam is a rich culture and a unique tradition which must be understood on its own merits. The author brings insight into what Islam means, how it is practiced and its relationship with other religions. He also analyzes the concept of Jihad, the role of women in Islam and the values that Islam cherishes. The development of Islam in America and the roles that Muslims play in the United States are also elaborated upon in this volume.

2 The origins of Islamic law
Observing the Observer Zahid Bukhari, Sulayman Nyang, 2012-01-01
THE collection of papers in this volume documents the study of Islam in American Universities. Over the last few decades the United States has seen significant growth in the study of Islam and Islamic societies in institutions of higher learning fueled primarily by events including economic relations of the U.S. with Muslim countries, migration of Muslims into the country, conversion of Americans to Islam, U.S. interests in Arab oil resources, involvement of Muslims in the American public square and the tragic events of 9/11. Although there is increasing recognition that the study of Islam and the role of Muslims is strategically essential in a climate of global integration, multiculturalism and political turmoil, nevertheless the state of Islamic Studies in America is far from satisfactory. The issue needs to be addressed particularly as the need for intelligent debate and understanding is continuously stifled by what some have termed an Islam industry run primarily by fly-by-night journalists, think tank pundits and cut-and-paste experts.

Religion and the Environment: Ectheology II: Islma, Asian traditions and indigenous traditions Roger S. Gottlieb,2010

In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity's treatment of the environment have developed. Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings; institutional commitment by organized religions and environmental activism explicitly oriented to religious ideals. Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality, poverty or war and peace is now a basic and compelling religious matter. Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition, profound criticisms of the past and ecologically oriented visions of God, the Sacred, the Earth and human beings. Theologians from every religious tradition along with dozens of non-denominational spiritual writers have confronted world religions' past attitudes towards nature. In the realm of institutional commitment, public statements and actions by organized religions have grown dramatically. In the context of political action throughout the U.S. and the world, religiously oriented groups take part in environmentally oriented political action from lobbying and consciousness raising to activist demonstrations and civil disobedience. This collection serves as a comprehensive introduction, overview and in-depth account of these exciting new developments. The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy, from new ecumenical connections among different religions and between religion, science and environmental movements, from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded.
