Handbook of Research on Assessment Literacy and Teacher-Made Testing in the Language Classroom White, Eddy, Delaney, Thomas, 2018-11-23 The evaluation of student performance and knowledge is a critical element of an educator's job as well as an essential step in the learning process for students. The quality and effectiveness of the evaluations given by educators are impacted by their ability to create and use reliable and valuable evaluations to facilitate and communicate student learning. The Handbook of Research on Assessment Literacy and Teacher-Made Testing in the Language Classroom is an essential reference source that discusses effective language assessment and educator roles in evaluation design. Featuring research on topics such as course learning outcomes, learning analytics, and teacher collaboration, this book is ideally designed for educators, administrative officials, linguists, academicians, researchers, and education students seeking coverage on an educator's role in evaluation design and analyses of evaluation methods and outcomes. **Program Evaluation**

Theory and Practice, *Artificial Intelligence in Education: The Intersection of Technology and Pedagogy* Peter Ilic, Imogen Casebourne, Rupert Wegerif, 2024-12-02 This book offers a multidisciplinary perspective on the ways in which the careful integration of AI might enhance learning outcomes. By inviting dialogue between engineering (what is possible) and pedagogy (what might be desirable), the book offers a holistic view of AI's potential for education. Offering both case studies of practical implementation and pedagogically informed frameworks, it focuses on appropriately integrating technology for educational benefit, presenting a uniquely broad view. The contributors, who are both educators and technically proficient, bring insights into teaching and assessment approaches, research questions, and technological affordances or constraints. Essential for researchers, educators, and policymakers navigating the rapidly evolving educational technology landscape as AI becomes increasingly prevalent in every aspect of life. Teaching to Exceed the English Language Arts Common Core State Standards Richard Beach, Amanda Haertling Thein, Allen Webb, 2012-06-25 As the new English Language Arts Common Core State Standards take hold across the United States, the need grows for pre-service and in-service teachers to be ready to develop curriculum and instruction that addresses their requirements. This timely, thoughtful, and comprehensive text directly meets this need. It delineates a literacy practices and critical engagement curriculum framework for 6-12 English language arts education that explains and illustrates how the Standards' highest and best intentions for student success can be implemented from a critical, culturally relevant perspective that is firmly grounded in current literacy learning theory and research. The first 6-12 English language arts methods text to be aligned with the Standards, this book also addresses their limitations: formalist assumptions about literacy learning, limited attention to media/digital literacies, lack of attention to critical literacies, and questionable assumptions about linking standards and text complexity to specific grade levels. Specific examples of teachers using the literacy practices/critical engagement curriculum framework in their classrooms show how these limitations can be surpassed. Features: Moves the CCSS framework into a view that literacy is a contextualized social

practice Challenges simplistic models that homogenize adolescent learners Adds the important element of critical literacy to English language arts classrooms Provides specific examples of teachers in action implementing these practices Interactive Companion Website with student and instructor resources The Website is designed to foster interactivity through participation in an online teaching planning simulation with a text video or case on one side of the screen and a chat box for instructors and students to share their reactions and planning ideas The Companion Website is linked to a wiki that serves as a repository for links activities units and further reading
