The Courage To Create Rollo May:

The Courage to Create Rollo May, 1994-03 Extraordinary wise and hopeful nearly poetic meditations Boston Globe
What if imagination and art are not as many of us might think the frosting on life but the fountainhead of human experience
What if our logic and science derive from art forms rather than the other way around In this trenchant volume Rollo May
helps all of us find those creative impulses that once liberated offer new possibilities for achievement A renowned therapist
and inspiring guide Dr May draws on his experience to show how we can break out of old patterns in our lives His insightful
book offers us a way through our fears into a fully realized self *Summary of Rollo May's The Courage to Create* Everest
Media, 2022-05-15T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 We are
living in an age of limbo where one age is dying and the new age is not yet born We cannot ignore the changes in sexual
mores marriage styles family structures education and religion 2 Courage is the foundation that underlies and gives reality to
all other virtues It is not a virtue or value among other personal values like love or fidelity It is the basis that underlies and
gives reality to all other virtues 3 The most simple and obvious form of courage is physical We need a new form of physical
courage that will neither run rampant in violence nor require our assertion of egocentric power over other people 4 Moral
courage is the second type of courage It is the courage to stand up for what is right even if it means standing alone It is
based on one's capacity to perceive the suffering of others and it arises from compassion for that suffering **The**
Mind-Brain Continuum Susan Gordon, 2023-01-01 This insightful book proposes a holistic theory of the development of self
drawing on interdisciplinary literature in existential phenomenology neurophenomenology intracrinology endocrinology and
naturopathic medicine The psychoneurointracrine hypothesis bridges the gap between the mind and brain providing a
framework to explain the complex system that facilitates development of one's sense of self and well being The book
challenges assumptions in present day neuroscience and psychiatry placing the mind and brain on a continuum of health and
growth rather than reducing the study of human consciousness to neurobiological terms and pathological classifications In
this landmark book Susan Gordon presents a bold hypothesis one that underscores the importance of psychoneurointracrine
activity and links it to female neurology and the development of one's sense of self She brilliantly places this activity which
serves as a mind body bridge within the frameworks of neurophenomenology and non linear dynamics Her
psychoneurointracrine hypothesis is a tour de force one that is holistic integrating intracrinology with psychology and
neurology This hypothesis undercuts the current assumption that the mind is an epiphenomenon of the brain creating a
paradigm that impacts science's understanding of behavior experience consciousness and human agency Stanley Krippner
PhD Affiliated Distinguished Faculty California Institute of Integral Studies San Francisco CA In her fascinating book Susan
Gordon develops a novel theory about the biological connection between mind brain and organism Drawing on empirical
research on the role of the female hormonal system in basal states of self and mood she shows that the biochemistry of the

endocrine system must be viewed as an indispensable foundation for the emergence of embodied self awareness The homeostasis and hormonal balance of the organism is integral to the sense of well being and the development of meaning but it is also continually modulated and influenced by the subject s experience of his or her world In this way she makes a decisive contribution to a theory of embodiment that goes far beyond a computational theory of the brain to focus on the biochemical organismic processes at the root of the mind Thomas Fuchs MD PhD Karl Jaspers Professor of Philosophy and Psychiatry University of Heidelberg DE
