Selecting Models from Data P. Cheeseman, R.W. Oldford, 1994-05-27 This volume is a selection of papers presented at the Fourth International Workshop on Artificial Intelligence and Statistics held in January 1993 These biennial workshops have succeeded in bringing together researchers from Artificial Intelligence and from Statistics to discuss problems of mutual interest The exchange has broadened research in both fields and has strongly encouraged interdisciplinary work The theme of the 1993 AI and Statistics workshop was Selecting Models from Data The papers in this volume attest to the diversity of approaches to model selection and to the ubiquity of the problem Both statistics and artificial intelligence have independently developed approaches to model selection and the corresponding algorithms to implement them But as these papers make clear there is a high degree of overlap between the different approaches In particular there is agreement that the fundamental problem is the avoidance of overfitting Le where a model fits the given data very closely but is a poor predictor for new data in other words the model has partly fitted the noise in the original data
