In *Applied Software Project Management*, Andrew Stellman and Jennifer Greene provide you with tools, techniques, and practices that you can use on your own projects, right away. This book supplies you with the information you need to diagnose your team's situation and presents practical advice to help you achieve your goal of building better software. Topics include: Planning a software project, Helping a team estimate its workload, Building a schedule, Gathering software requirements and creating use cases, Improving programming with refactoring, unit testing, and version control, Managing an outsourced project, Testing software. Jennifer Greene and Andrew Stellman have been building software together since 1998. Andrew comes from a programming background and has managed teams of requirements analysts, designers, and developers.
