Nevárez-Moorillón, Arely Prado-Barragán, José Luis Martínez-Hernández, Cristobal Noé Aguilar, 2020-05-27 *Food Microbiology and Biotechnology Safe and Sustainable Food Production* explores the most important advances in food microbiology and biotechnology with special emphasis on the challenges that the industry faces in the era of sustainable development and food security problems. Chapters cover broad research areas that offer original and novel highlights in microbiology and biotechnology and other related sciences. The authors discuss food bioprocesses, fermentation, food microbiology, functional foods, nutraceuticals, extraction of natural products, nano and micro technology, innovative processes, bioprocesses for utilization of by products, alternative processes requiring less energy or water among other topics. The volume relates some of the current developments in food microbiology that address the relationship between the production, processing, service and consumption of foods and beverages with the bacteriology, mycology, virology, parasitology and immunology. Demonstrating the potential and actual developments across the innovative advances in food microbiology and biotechnology, this volume will be of great interest to students, teachers and researchers in the areas of biotechnology and food microbiology.

Advances in Thermal and Non-Thermal Food Preservation Gaurav Tewari, Vijay Juneja, 2008-02-28 *Advances in Thermal and Non Thermal Food Preservation* provides current, definitive and factual material written by experts on different thermal and non thermal food preservation technologies. Emphasizing inactivation of microorganisms through the application of traditional as well as newer and novel techniques and their combinations, the book's chapters cover thermal food preservation techniques e.g. retorting, UHT and aseptic processing, minimal thermal processing e.g. sous vide processing and non thermal food preservation techniques e.g. high pressure processing and pulsed technologies. Editors Tewari and Juneja give special emphasis to the commercial aspects of non conventional food preservation techniques. As the most comprehensive and contemporary resource of its kind, *Advances in Thermal and Non Thermal Food Preservation* is the definitive standard in describing the inactivation of microorganisms through conventional and newer, more novel techniques.
