[Basic Of React Native](#) Govind Prasad Gupta, About react native React Native is a JavaScript framework for writing real natively rendering mobile applications for iOS and Android It s based on React Facebook s JavaScript library for building user interfaces but instead of targeting the browser it targets mobile platforms In other words web developers can now write mobile applications that look and feel truly native all from the comfort of a JavaScript library that we already know and love Plus because most of the code you write can be shared between platforms React Native makes it easy to simultaneously develop for both Android and iOS Why react native There is much hybrid technology like the phone gap but UI experience is not good for these libraries But react native is using native iOS and android component and using bridge method to communicate So react native UI and performance are similar to the native project **Beginning Google Maps API 3**

Gabriel Svennerberg,2010 This book is about the next generation of the Google Maps API It will provide the reader with the skills and knowledge necessary to incorporate Google Maps version 3 on web pages in both desktop and mobile browsers It also describes how to deal with common problems that most map developers encounter at some point like performance and usability issues with having too many markers and possible solutions to that Introduction to the Google Maps API version 3 Solutions to common problems most developers encounters too many markers common JavaScript pitfalls Best practices using HTML CSS JavaScript and Google Maps
