The Effects of Trauma Jim Banks, 2011-03. The following book describes a prayer tool that I stumbled across in late 2009 by putting pieces of the teachings of three of God's faithful servants together and adding a couple of others' steps. The power of it to virtually eliminate many of the symptoms that victims of trauma complain of has proven to be nothing short of miraculous. Over the last 25 years of praying for physical and emotional healing, I have prayed numerous prayers that at least in my estimation availed little. But the last 400 or 500 folks or so that I have ministered this over have experienced relief that has been both instantaneous and up to this point permanent. I am also happy to report that the recipients have experienced some significant results after having been prayed over in groups of 25 to 175 persons.

First Responder Trauma Recovery Guide and Workbook (First Edition) Kevin William Grant, 2021-07-14. Stress, anxiety, depression, trauma, post-traumatic stress disorder, PTSD, bullying, and burnout have all become accepted realities for first responders in the modern workplace. This workbook unpacks contemporary workplace realities, educates you about trauma, and helps you build your personalized recovery plan for transformation, recovery, and healing. This recovery program has eight core purposes: Validate your current situation. This recovery program begins by validating your experiences and breaking through any denial you may be experiencing by examining all the ways you could be traumatized at work. Identify your realities. Once you understand how you've been traumatized, you'll learn about how trauma develops and how to break through the defenses that protect you from the painful experiences you're facing. Understand workplace trauma. Armed with a deeper understanding of what trauma is, how it develops, and how you react to trauma, you will be able to identify the support you'll need to heal and recover. Build your recovery team and develop your action plan. Useful tools and techniques will help you connect with and build your team of support professionals and advocates. Once you begin working with your team, you'll start the recovery process by acquiring a set of skills and techniques to help you weather the storm and begin healing. Grieve, mourn, and let go. Recovery will take you on a journey of grieving, mourning, and letting go, which will transport you to a new sense of calm and acceptance. I'll break down this journey into the stages you'll travel through to get to the other side. Maintain your recovery. Finally, I'll share helpful ways to maintain your recovery, manage setbacks with compassion, and track your progress so you can proactively navigate the inevitably choppy waters as you continue your healthy and productive recovery. Adapt and adjust to the impacts of the COVID-19 Pandemic. The COVID-19 global Pandemic has left a lasting impact on all our lives. This section will review the Pandemic's mental health, physical health, and social implications with helpful tools and techniques to help you manage the trauma and stress the Pandemic brings. incrementally create a personalized recovery plan Each exercise in the workbook walks you through a process of self reflection and self discovery to help you understand and make sense of your situation

First Responder Careers Expose Individuals to Higher Risks of Developing Trauma

Some careers include a higher likelihood of experiencing traumatic events that can lead to the development of PTSD Serving in the military is a high risk factor for developing PTSD However combat veterans develop PTSD at different rates depending on the severity and length of exposure to traumatic experiences There are also high incidences of reported sexual harassment and sexual abuse in the military As a result the rates of PTSD are relatively high compared to the overall prevalence in the general population Not only can law enforcement officers experience direct threats and stressful conditions but they also regularly witness the devastating effects of assaults robberies kidnappings and violent events However individuals in this profession have lower than expected rates of PTSD surprisingly An estimated 20 percent overall may result from having access to counseling and rigorous pre employment screenings EMTs and paramedics are routinely exposed to life threatening incidents and have more health problems than individuals in other occupations PTSD rates in this group are as high as 20 percent PTSD prevalence in this profession is comparable to law enforcement Firefighters conduct paramedic activities and are the first responders to natural disasters Firefighting is a dangerous profession that exposes workers to stressful conditions and traumatic events ranging from threats to their safety and experiencing the devastating effects of catastrophes As a result the prevalence of PTSD in this group can be as high as 20 percent Volunteer firefighters may have even higher rates because they don't have access to the same level of support as career firefighters Healthcare workers especially those working in emergency rooms and intensive care units are also at higher risk For example nurses working in critical care units are more likely to develop PTSD than nurses in other groups In addition while senior level nurses report fewer PTSD symptoms than junior ones they report higher rates of burnout Finally healthcare workers exposed to patients that have experienced violence such as an assault victim are more likely to develop PTSD than surgeons who treat assault victims Rescue workers medical workers and volunteers who act as first responders during disasters witness the aftermath of horrific events and can even become involved in severe traumatic events The prevalence of PTSD in these individuals has been estimated to be between 15 and 30 percent Journalists who work as war correspondents are at higher risk of being injured killed or kidnapped Their lifetime prevalence of PTSD which can be as high as 30 percent reflects their lack of access to support and PTSD treatment options Transit and train operators are frequently exposed to physical threats and witness suicide incidents such as person under train events Exposure to these traumatic and threatening circumstances can be a daily or weekly occurrence Bus drivers are more prone to PTSD because they have more direct contact with the general public than train drivers locked in secure train cabs In these high risk professions the incidence of trauma declines when policies are in place to debrief victims give victims immediate access to counseling and screen for individuals at high risk of having adverse reactions to traumatic conditions
