quantmod

The quantmod package for R is designed to assist the quantitative trader in the development, testing, and deployment of statistically based trading models.

What quantmod IS

A rapid prototyping environment, where quant traders can quickly and clearly explore and build trading models.

What quantmod is NOT

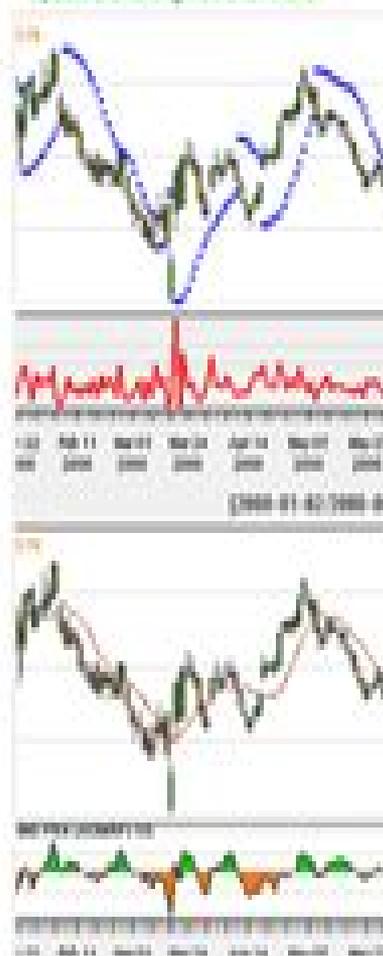

A replacement for anything statistical. It has no 'low' modeling routines or analysis tool to speak of. It does now offer charting not currently available elsewhere in R, but most everything else is more of a wrapper to what you already know and love about the language and packages you currently use.

quantmod makes modeling easier by removing the repetitive workflow issues surrounding data management, modeling interfaces, and performance analysis.

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
