Mindfulness in Internet and New Media Wen-Ko Chiou,Chao Liu,Hao Chen,Shuhua Zhou,2023-10-24 Mindfulness is about being aware in a certain way being consciously aware on purpose living in the present moment without mental judgment In addition to the in depth application of mindfulness in different subdisciplines of psychology e.g social personality clinical developmental health organizational there is also a trend toward cross fertilization with other social and behavioral disciplines e.g design kinesiology sociology family studies education anthropology neuroscience philosophy economics medicine organizational science However the application of mindfulness in the field of communication is limited With the rapid development of the Internet and new media the study of Internet communication is growing rapidly The Internet and new media make it easy to connect with others explore a new world and regard cyberspace as an extension of one's own thoughts and personality Nevertheless when people use the Internet and new media mindless they will easily experience the social effects on their virtual selves and encounter psychological problems e.g network morality network anxiety network pornography network addiction and cyberbullying which has become a widespread and serious problem As an important part of positive psychology mindfulness intervention has been proved to help improve a series of negative psychological states and promote positive emotions and subjective well being However what theoretical and practical contributions can mindfulness in the Internet and new media bring remains unknown Thus this Research Topic focuses on the influence and intervention of mindfulness on the psychological problems caused by the network new media communication We welcome high quality studies using a variety of research methods including quantitative qualitative mixed methods and reviews on the second generation of mindfulness interventions and other meditation based interventions e.g focused attention meditation transcendental meditation and loving kindness meditation This Research Topic encourages submissions that cover but are not limited to the following topics 1 The internet and new media guided mindfulness and loving kindness meditation practice 2 Mindfulness and interpersonal communication in the network network trust network security network intimacy 3 Mindfulness and network clustering behavior 4 Mindfulness and online consumer psychology 5 Mindfulness and cyber moral psychology cyberbullying cyber altruism and prosocial behavior 6 Mindfulness and online pornography 7 Mindfulness and internet addiction 8 Mindfulness and online psychological counseling 9 Mindfulness and new media anxiety

The Mindful Manifesto Dr. Jonty Heaversedge,Ed Halliwell,2021-10-19

Stress is endemic in our culture. We live in a speedy pressurized world and there's often little time to really experience and enjoy our lives. Rather than constantly trying to keep up, perhaps it's time for us to stop and pay attention to our bodies, minds, and the world. For thousands of years, Eastern traditions have taught meditation to help people lead healthier, happier lives. Now, scientific research is confirming that mindfulness can help us all improve our mental and physical well-being. Written by Dr. Jonny Heaveresdge and Ed Halliwell, *The Mindful Manifesto* integrates the latest scientific and medical research on mindfulness with meditation's historical context. We will see how mindfulness can treat mental health problems such as depression and anxiety, help us cope with the busyness of everyday life, improve our physical health, and manage chronic illness. It helps us let go of unwanted behaviors and improve how we function in our relationships and jobs. And why stop there? With examples of how the mindfulness movement is already well underway, we see that encouraging governments and other powerful institutions to take a mindful approach could make a massive difference to the health and happiness of the whole world.

Mindfulness for Beginners Jeffrey Holloway, 2017-01-26. Mindfulness is a scientifically proven method to reduce stress and anxiety while giving us a greater appreciation of the world and increasing personal well-being. Mindfulness now has a wealth of scientific evidence proving the benefits associated with it, and this book combines the science with simple and concise exercises to enable you to make a lasting positive change to your life. Mindfulness practices have been around for roughly 2500 years. Over the centuries, the practices have taken on different forms, but the foundational purpose has always remained the same: Mindful meditation is meant to end suffering and to teach us to live in the moment. In addition to this being a Buddhist-based practice, the practice of mindful meditation has been noticed in the scientific and medical communities. The benefits to using mindfulness are fantastic, and now there is scientific evidence to back up the powerful, centuries-old healing practice. Mindfulness is a form of awareness, a way of life, a new way to be free of stress and anxiety. It is experiencing your thoughts, sensations, and emotions without trying to control them. Its virtues have been expounded by
