Topic :

the prevailing social problems of Pakistan and the strategies to deal with them.

Poverty

In the context of Pakistan, poverty has been a persistent challenge, affecting a significant portion of the population. **One key factor contributing to poverty in Pakistan is the unequal distribution of wealth and resources. Economic disparities, lack of access to education, and limited employment opportunities in certain regions further exacerbate the issue.**

An incident that highlights the challenges of poverty in Pakistan is the 2010 floods. Massive flooding affected millions of people, destroying homes, crops, and infrastructure. This natural disaster disproportionately affected those already living in poverty, pushing many more into extreme deprivation. The floods not only highlighted the vulnerability of impoverished communities but also exposed weaknesses in the country's infrastructure and disaster management systems.

Additionally, rural areas in Pakistan often face higher levels of poverty compared to urban centers. **Limited access to education, healthcare, and job opportunities in rural settings contributes to a cycle of poverty that can be challenging to break.** The lack of proper infrastructure, such as roads and electricity, also hampers economic development in these regions.

Poverty is on the rise as the [World Bank](#) predicted that by the end of 2023, 37.2% of people will live in poverty (\$3.65/day). The figure is a little lower than the most recent estimate in 2018, which was 39.8%.
