Lithium Metal Anodes and Rechargeable Lithium Metal Batteries Ji-Guang Zhang, Wu Xu, Wesley A. Henderson, 2016-10-06 This book provides comprehensive coverage of Lithium Li metal anodes for rechargeable batteries Li is an ideal anode material for rechargeable batteries due to its extremely high theoretical specific capacity 3860 mAh g⁻¹ low density 0.59 g cm⁻³ and the lowest negative electrochemical potential 3.040 V vs standard hydrogen electrodes Unfortunately uncontrollable dendritic Li growth and limited Coulombic efficiency during Li deposition stripping inherent in these batteries have prevented their practical applications over the past 40 years With the emergence of post Li-ion batteries safe and efficient operation of Li metal anodes has become an enabling technology which may determine the fate of several promising candidates for the next generation energy storage systems including rechargeable Li air batteries Li-S batteries and Li metal batteries which utilize intercalation compounds as cathodes In this work various factors that affect the morphology and Coulombic efficiency of Li anodes are analyzed The authors also present the technologies utilized to characterize the morphology of Li deposition and the results obtained by modeling of Li dendrite growth Finally recent developments especially the new approaches that enable safe and efficient operation of Li metal anodes at high current densities are reviewed The urgent need and perspectives in this field are also discussed The fundamental understanding and approaches presented in this work will be critical for the application of Li metal anodes The general principles and approaches can also be used in other metal electrodes and general electrochemical deposition of metal films

Statistical Rethinking Richard McElreath, 2016-01-05 Statistical Rethinking A Bayesian Course with Examples in R and Stan builds readers knowledge of and confidence in statistical modeling Reflecting the need for even minor programming in today's model based statistics the book pushes readers to perform step by step calculations that are usually automated This unique computational approach ensures that readers understand enough of the details to make reasonable choices and interpretations in their own modeling work The text presents generalized linear multilevel models from a Bayesian perspective relying on a simple logical interpretation of Bayesian probability and maximum entropy It covers from the basics of regression to multilevel models The author also discusses measurement error missing data and Gaussian process models for spatial and network autocorrelation

By using complete R code examples throughout this book provides a practical foundation for performing statistical inference. Designed for both PhD students and seasoned professionals in the natural and social sciences it prepares them for more advanced or specialized statistical modeling. Web Resource The book is accompanied by an R package rethinking that is available on the author's website and GitHub. The two core functions `map` and `map2stan` of this package allow a variety of statistical models to be constructed from standard model formulas.

Science Education Research and Practice in Asia-Pacific and Beyond Jennifer Yeo, Tang Wee Teo, Kok-Sing Tang, 2017-10-16 This book is based on presentations at the International Science Education Conference ISEC 2014. It showcases a selection of the best papers by researchers and science teachers from the Asia Pacific region, North America and the United Kingdom. Centered on the theme of Pushing the boundaries Investing in our future they pursue new ways of helping learners appreciate the diversity and changes in science that result from a globalised world facing complex and diverse environmental and technological issues. The chapters touch on various themes in science education that explore and investigate issues of scientific literacy, societal challenges and affect and teacher professional development. Its comprehensive themes make it a valuable textbook for graduate students of master's and Ph D programs. It also appeals to pre-service and in-service teachers as a resource on innovative pedagogical practices and creative methods of professional development. With a selection that emphasises the research-practice nexus in education research it serves as an introductory handbook for teachers to connect with the current issues facing science education.

Environmental Chemistry Stanley E. Manahan, 2022-06-19 With clear explanations, real-world examples and updated ancillary material, the 11th edition of *Environmental Chemistry* emphasizes the concepts essential to the practice of environmental science, technology and chemistry. The format and organization popular in preceding editions is used, including an approach based upon the five environmental spheres and the relationship of environmental chemistry to the key concepts of sustainability, industrial ecology and green chemistry. The new edition provides a comprehensive view of key environmental issues and significantly looks at diseases and pandemics as an environmental problem influenced by other environmental concerns like climate change. Features: The most trusted and best-selling text for environmental chemistry has been fully updated and expanded once again. The author has preserved the basic format with appropriate updates, including a comprehensive overview of key environmental issues and concerns. New to this important text is material on the threat of pathogens and disease, deadly past pandemics that killed millions, recently emerged diseases and the prospects for more environment threats related to disease. This outstanding legacy appeals to a wide audience and can also be an ideal interdisciplinary book for graduate students with degrees in a variety of disciplines other than chemistry. New! Long-awaited companion website featuring additional ancillary material.
