**The Rebirth of the Russian Space Program** Brian Harvey,2007-11-25 The rebirth of the Russian space program marks an important event 50 years since the first Sputnik was launched on 4th October 1957 At that time few could have imagined the dramatic events that lay head The Soviet Union achieved all the great firsts in cosmonautics the first satellite in orbit the first animal in orbit the first laboratory in orbit the first probe to the Moon the first probe to photograph its far side the first soft landing on the moon the first man in space the first woman in space the first spacewalk Except one the first human landing on the Moon In 1964 the Soviet Union decided to contest the decision of the United States to put the first person on the Moon The Soviet Union engaged in that race far too late with divided organization and made a gallant but doomed challenge to Apollo Undaunted the Soviet Union rebuilt its space program around orbiting stations building the first one Salyut and then the first permanent home in space Mir The Soviet Union still achieved many more firsts the first lunar rover the first soft landing on Venus the first soft landing on Mars the first recovery of samples from the Moon by automatic spacecraft **The Griffith Observer** ,1995 **A Reader-study Guide for Cosmos, Carl Sagan** Ann Elwood,1980

**New Floral Guide** ,1900 **Youth's Companion** ,1927 Cosmos v.2, 1884 Alexander von Humboldt,1880 Soviet and Russian Lunar Exploration Brian Harvey,2007-08-17 When in July 1969 the Americans decisively beat the Soviet Union in the race to put an astronaut on the moon this event had profound historical scientific and political implications This book tells the story of the Soviet and Russian lunar programme from its origins to the reconsideration of a lunar programme in the present day federal Russian space programme Following Sputnik the first Soviet lunar flights achieved the key goals of hitting circling and photographing the moon in 1959 The Soviet Union planned to achieve the biggest prize of them all the first person to land on the moon and built all the key spaceships required to do so such as a lunar orbiter and lander Brian Harvey describes the techniques devised by the USSR for lunar landing from the LK lunar module to the LOK lunar orbiter and tested versions in Earth orbit He asks whether these systems would have worked and examining how well they were tested concludes that they would have the Soviet Union lost the moon race for political not technical reasons Designs for moon bases were even drawn up In the end the Soviet Union ran an impressive series of robotic missions from 1968 to 1976 to circle the moon map the far side conduct scientific observations from orbit recover samples and rove over the surface The scientific haul from these missions is surveyed what was actually learned about the moon its rocks and the lunar environment that will be useful for the present plans by the United States to return to the moon and for other countries such as India and China to conduct their own lunar exploration The book opens in Surgut Siberia in August 1976 with a largely forgotten event

the return to Earth after a three day journey from the moon under a single parachute of the tiny Luna 24 cabin with a core sample drilled deep into the Sea of Crises a remarkable scientific and engineering achievement It ends with an examination of projected missions from plans to explore the far side and set up lunar observatories to the Luna Glob explorer of the 1990s There is also discussion of lunar tourism using a modernized version of the Zond spacecraft which flew around the moon from 1968 to 1970 The Garden Magazine ,1913 *Garden and Home Builder* ,1912 *Garden & Home Builder* William Tyler Miller,1913 *Cosmos: a Sketch of a Physical Description of the Universe* Alexander von Humboldt,1852 **Garden Magazine and Home Builder** ,1921 **Metropolitan Pulpit and Homiletic Monthly** ,1923
