Coleman, 2000-04-18 This first revised edition with substantial new material and updates is written for both the seasoned professional and the student just learning the art of mediation and conflict resolution between individuals groups organizations and nations **Impact of Gender, Organizational Role, and Multicultural Status on Conflict Resolution Style Preference** Jennifer Lea Holt, 2000 This research involved primarily a meta analysis of conflict resolution research derived from Blake and Mouton's 1964 dual concerns theory Secondly focus group research assessed the field validity of the results Dual concerns theory postulates that organizational conflict involves balancing the desire to obtain one's own goals concern for production versus the desire to retain interpersonal relationships concern for people By placing the two aspects on an axis called the managerial grid Blake and Mouton mapped out five styles of managing conflict forcing avoiding accommodating compromising and problem solving Numerous studies validate the central ideas of the theory respondents rank styles of resolving conflict depending upon the degree of concern for retaining relationships versus the degree of concern for meeting goals However there is great disparity among study results In this study meta analytic

techniques were used to provide a clearer overall picture of conflict resolution rankings. Analyses were conducted of published and unpublished research results with statistical measures of conflict resolution style preferences focusing on the variables of worker minority status including ethnicity, gender, and foreign national and organizational role status of referent group including superior, subordinate, and peer. The results of the meta-analyses were: 1. Ethnicity and foreign national: insufficient studies for overall meta-analysis; tentative results using one instrument showed Asian ethnicities highest on avoiding, Middle Easterners highest on compromising, Hispanic Americans highest on accommodating, African Americans lowest on avoiding, and European Americans highest on problem solving. 2. Gender: meta-analysis indicated females were significantly more likely to use accommodating and compromising, males significantly preferred forcing. 3. Organizational role: meta-analysis indicated respondents used avoiding significantly more with peers than with subordinates and compromising style less with subordinates than superiors. Focus group results corroborated the results in general but there was strong consensus about the need to regard each individual as a unique combination of many influences. Further research is needed particularly on multicultural status; however, due to the tendency for pertinent studies to favor more inclusive conflict resolution instruments than those utilized for the purposes of this research, other means of overall analysis should be considered. **Journal of Dispute Resolution**, 2003 **Annual Meeting** Speech Communication Association, 1968

The Handbook of Conflict Resolution Peter T. Coleman, Morton Deutsch, Eric C. Marcus, 2014-02-28 Praise for The Handbook of Conflict Resolution: This handbook is a classic. It helps connect the research of academia to the practical realities of peacemaking and peacebuilding like no other. It is both comprehensive and deeply informed on topics vital to the field like power, gender, cooperation, emotion, and trust. It now sits prominently on my bookshelf. Leymah Gbowee, Nobel Peace Prize Laureate. The Handbook of Conflict Resolution offers an astonishing array of insightful articles on theory and practice by leading scholars and practitioners. Students, professors, and professionals alike can learn a great deal from studying this Handbook. William Ury, Director, Global Negotiation Project, Harvard University, coauthor, *Getting to Yes* and author, *The Third Side*. Morton Deutsch, Peter Coleman, and Eric Marcus put together a handbook that will be helpful to many. I hope the book will reach well beyond North America to contribute to the growing worldwide interest in the constructive resolution of conflict. This book offers instructive ways to make this commitment a reality. George J. Mitchell, Former majority leader of the United States Senate, former chairman of the Peace Negotiations in Northern Ireland and the International Fact-Finding Committee on Violence in the Middle East, chairman of the board, Walt Disney Company, senior fellow at the School of International and Public Affairs, Columbia University. Let's be honest: This book is just too big to carry around in your hand. But that's because it is loaded with the most critical essays linking the theory and practice of conflict resolution. The Handbook of Conflict Resolution is heavy on content and should be a well-referenced resource on the desk of every mediator as it is on mine. Johnston Barkat, Assistant Secretary General, Ombudsman and Mediation Services, United Nations.
