The View From Nowhere Thomas Nagel:

The ^AView From Nowhere Thomas Nagel,1986-01-23 Human beings have the unique ability to view the world in a detached way but at the same time each of us is a particular person in a particular place each with his own personal view of the world Thomas Nagel s ambitious and lively book tackles this fundamental issue arguing that our divided nature is the root of a whole range of philosophical problems touching every aspect of human life He deals with its manifestations in such fields of philosophy as the mind body problem personal identity knowledge and skepticism thought and reality free will ethics the relation between moral and other values the meaning of life and death The Subjectivity of the Mental Jeremy W. Bowman,1987

The View from Nowhere Thomas Nagel,1986 Human beings have the unique ability to view the world in a detached way We can think about the world in terms that transcend our own experience or interest and consider the world from a vantage point that is in Nagel s words nowhere in particular At the same time each of us is a particular person in a particular place each with his own personal view of the world a view that we can recognize as just one aspect of the whole How do we reconcile these two standpoints intellectually morally and practically To what extent are they irreconcilable and to what extent can they be integrated Thomas Nagel s ambitious and lively book tackles this fundamental issue arguing that our divided nature is the root of a whole range of philosophical problems touching as it does every aspect of human life He deals with its manifestations in such fields of philosophy as the mind body problem personal identity knowledge and skepticism thought and reality free will ethics the relation between moral and other values the meaning of life and death Excessive objectification has been a malady of recent analytic philosophy claims Nagel it has led to implausible forms of reductionism in the philosophy of mind and elsewhere The solution is not to inhibit the objectifying impulse but to insist that it learn to live alongside the internal perspectives that cannot be either discarded or objectified Reconciliation between the two standpoints in the end is not always possible *Ethics in Sport* William John Morgan,2007 This is a text for students in sport philosophy sport ethics sport management and sport studies courses as well as a reference for professionals with an interest in sport ethics World renowned experts examine the moral and ethical issues surrounding sport in contemporary society addressing current debates

Minds and Bodies Colin McGinn,1997-08-28 In *Minds and Bodies* Colin McGinn offers proof that contemporary philosophy in the hands of a consummate reviewer can be the occasion not only sharp critical assessment but also writing so clear and engaging that readers with no special background in the subject but simply a taste for challenging idea can feel welcome Gathering nearly forty review essays printed mainly in nonspecialist publications over the past twenty years McGinn a distinguished philosopher and teacher measures the best of recent Anglo American philosophical writing considering books by Thomas Nagel John Searle and Daniel Dennett among others and navigating with energy and wit important new work in ethics philosophy of language and philosophy of mind Opening with a section on philosophical lives books written on or by Ludwig Wittgenstein Bertrand Russell Charles Peirce and A J Ayer McGinn moves

to the question of consciousness offering readers two dozen crisp and provocative pieces on work seeking to define and illuminate the mind its activity and its relation to the world of physical objects Closing with a section on ethics McGinn brings a bold and sharply original perspective to argument in such controversial areas as animal rights and feminist moral theory A bracing collection of masterfully written reviews that together form an accessible picture of philosophy as it is practiced today Minds and Bodies makes permanent the critical reflections of a gifted philosopher and writer and is destined to find an appreciative audience both within the philosophical community and in the wider culture of intellectually curious readers

Neuroscience and Critique Jan De Vos,Ed Pluth,2015-11-19 Recent years have seen a rapid growth in neuroscientific research and an expansion beyond basic research to incorporate elements of the arts humanities and social sciences It has been suggested that the neurosciences will bring about major transformations in the understanding of ourselves our culture and our society In academia one finds debates within psychology philosophy and literature about the implications of developments within the neurosciences and the emerging fields of educational neuroscience neuro economics and neuro aesthetics also bear witness to a neurological turn which is currently taking place Neuroscience and Critique is a ground breaking edited collection which reflects on the impact of neuroscience in contemporary social science and the humanities It is the first book to consider possibilities for a critique of the theories practices and implications of contemporary neuroscience Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com>

under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license **The Mind As a Scientific Object** Christina E. Erneling,David M. Johnson,2005-01-13 What holds together the various fields that are supposed to constitute the general intellectual discipline that people now call cognitive science In this book Erneling and Johnson identify two problems with defining this discipline First some theorists identify the common subject matter as the mind but scientists and philosophers have not been able to agree on any single satisfactory answer to the question of what the mind is Second those who speculate about the general characteristics that belong to cognitive science tend to assume that all the particular fields falling under the rubric psychology linguistics biology and so on are of roughly equal value in their ability to shed light on the nature of mind This book argues that all the cognitive science disciplines are not equally able to provide answers to ontological questions about the mind but rather that only neurophysiology and cultural psychology are suited to answer these questions However since the cultural account of mind has long been ignored in favor of the neurophysiological account Erneling and Johnson bring together contributions that focus especially on different versions of the cultural account of the mind [In Sensible Judgement](#) Max Deutscher,2016-05-23 Taking its bearings from classic texts including Plato Kant Hegel and Arendt this thoughtful and intriguing book provides philosophical reflection on what it is to judge and what judgement achieves alongside and sometimes in competition with thinking and willing Opening with the landmark Mabo High Court case in Australia and with detailed reference to other significant debates of judgement of the

twentieth century Max Deutscher seeks to explore and explain approaches to the concepts of what is good right and legal Describing a connection between reason and grounds intrinsic to judgement he analyses and explores the tendency towards absolutism that displaces proper judgement By weaving concrete instances of judgement with philosophical thought Deutscher provides a fascinating phenomenology of practices of judgement that should appeal to all readers with an interest in legal philosophical and political thought
