COMPUTER INTEGRATED MANUFACTURING ALAVUDEEN, A., VENKATESHWARAN, N., 2008-08-18 This up to date and accessible text deals with the basics of Computer Integrated Manufacturing CIM and the many advances made in the field It begins with a discussion on automation systems and gives the historical background of many of the automation technologies Then it moves on to describe the various techniques of automation such as group technology and flexible manufacturing systems The text describes several production techniques for example just in time JIT lean manufacturing and agile manufacturing besides explaining in detail database systems machine functions and design considerations of Numerical Control NC and Computer Numerical Control CNC machines and how the CIM system can be modelled The book concludes with a discussion on the industrial application of artificial intelligence with the help of case studies in addition to giving network application and signalling approaches Intended primarily as a text for the undergraduate and graduate students of mechanical production and industrial engineering and management the text should also prove useful for the professionals in the field

**Computer Integrated Manufacturing** Steven A. Melnyk, Ram Narasimhan, 1990 Encyclopedia of Production and Manufacturing Management Paul M. Swamidass, 2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic

innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field
