

The background of the cover is a photograph of two astronauts in white space suits working on the exterior of a space station. They are positioned in the upper center, with one appearing to be in a more active pose. Below them, the structure of the station is visible, including a large cylindrical component in the foreground. The Earth's horizon is seen in the lower half, with a thin layer of white clouds and a dark blue sky above. The overall scene is set against the blackness of space.

**Informationweek**, 2003. **Optimized Framework for High-Speed Object Detection in Badminton Using Deep Learning** Ashokkumar Kulandasamy, 2025-02-18. Research Paper. Undergraduate from the year 2024 in the subject Engineering Computer Engineering grade Graduate course Graduate B.E. language English abstract. Object detection is an important task in sports analysis, particularly in badminton, where the high-speed motion of the shuttlecock can make it challenging to detect. Here, we suggest a badminton high-speed object detection system using YOLO, a real-time object detection model. Our system is trained on a dataset of badminton images and videos.

along with corresponding object annotations The performance of our system is evaluated using several metrics including mean average precision precision recall F1 score and speed The results show that our system can achieve high accuracy and real time performance making it suitable for use in badminton analysis applications Our system can be used to detect and track the shuttlecock in real time providing valuable insights into the game such as the speed and trajectory of the shuttlecock which can be used to improve the performance of players and coaches **Conference Record** ,1989 **Event Processing: Designing IT Systems for Agile Companies** K.
